

Tenants Contents Insurance

Why Do I Need Contents Insurance?

Tenants Contents Insurance policies do not just cover your own possessions. It is possible to have other protection benefits. Tenant Contents Insurance policies can also protect you against damaging your Landlords property or you having an accident that could make you temporarily homeless or just to pay towards those expensive key fobs you have just lost!

This is what has happened to some residents:

Case 1: Whilst running the bath, a resident was distracted by a telephone call. When he eventually remembered he was running a bath, the water had been overflowing from the bath for some time. The water damage brought down the ceiling below. Having a Contents Insurance policy with accidental damage cover could cover the cost of repair for this type of event.

Case 2: A Tenant had keys stolen for a luxury apartment. The apartment keys were very expensive to replace as they incorporated access control fobs at over £100.00 each. Contents Insurance can help cover the cost of this replacement.

Case 3: Accidental damage was caused to a cold water pipe in a rented property, resulting in an extensive leak that required an emergency repair. Apart from the water damage caused to the property, the tenant was also facing a high bill from water supplier. Luckily this was also covered under his insurance.
